

MBA Cage Tipping utility

The 'go anywhere' compact waste collection vehicle

CAGE TIPPING UTILITY

Features fully painted steel tipping cage with integrated toolbox built to work hard. With light mesh cage the body can be fitted to most utility cab chassis and also custom built for 4wd utility vehicles.

Features are –

- Single acting dual stage telescopic cylinders allow the cage to tip, letting gravity empty the waste
- Recessed into the left hand side of the cage is a standard 202 type 240lt/120lt wheelie bin lifter. Simply wheel the bin up to the lifter and press the button. No manual lifting of bins
- Equipped with 2 Electro Hydraulic power packs to power the tipping action and bin lifter functions
- The hydraulic system is safely wired to the ignition, so if the Ute is not running, neither are the hydraulics.
- Locking toolbox keeps your tools tidy and secure, while the body is easily swept or hosed out.
- Compliant with WorkSafe OH&S waste vehicle guidelines

Need Special Requirements? If there is a way we can make your job a little easier through custom design, contact us and we'll gladly assess your requirements.

Call us and ask about our Cage Tipping Ute today...

The Cage Tipping Utility lets you quietly tip-toe around whilst collecting waste and recyclables anywhere the big trucks can't get into.

Ideal for outdoor events big or small, parks and gardens, shopping centers or city laneways this compact waste vehicle is an ideal addition to any waste fleet.

No manual handling required.

Operators only need a Car Licence to collect waste!
