Custom made steel pocket

Industrial lock-on riveting system

Solid tyre & foot brake

MBA 1100FLP is fitted with **Front Lift Pockets** and is designed for the use with front lift collection vehicles, but is compatible with most rear lift collection systems also

The two different collection lifters can therefore empty the **1100FLP**. The robust nature of the container makes it ideal for commercial, industrial & construction applications.

The **1100FLP** Pocket system is made from heavy duty steel and can be painted to order, or galvanized. The **1100FLP** riveting system, uses the latest in locking riveting to ensure the pockets are sturdy and on for good.

GENERAL SPECIFICATIONS

- The body and lid are injection moulded in solid-coloured high-density polyethylene stabilised against the combined effects of UV radiation and water.
- High-density polyethylene makes the product highly resistant to atmospheric conditions and gives it great stability against fluctuations in temperature.
- Manufactured using environmentally-friendly recyclable materials.
- The pigments used contain no heavy metals.
- Stable colours and total corrosion resistance.
- DIN, AFNOR, OSCHNER or VENTRAL lifting system.
- Ideal for different types of waste collection: paper and cardboard, glass, plastics and packaging, organic matter, etc.
- Openings with sizes and features specially designed to accommodate each type of waste, making them easy to use.
- Integrated handles in the body and lid for easy handling.
- Fitted with four 200 mm solid rubber wheels on 360° swivelling steel castor brackets as standard. Two of these are individually braked to prevent accidental movement.
- The four-wheeled units can optionally be fitted with steering systems and brakes on all wheels.
- Can be equipped with a range of accessories providing real solutions to every requirement:
 - pedal-operated lid opening
 - reflective strips
 - sound-proofing system
 - wheel direction positioner
 - lock
 - seal
 - brake
 - side handle
- Recess for electronic chips.
- Customisation of body with silk screen or thermal transfer graphic-maximum area 400 x 385 mm.
- Customisation of lid with silk screen or thermal transfer graphic-maximum area 230 x 45 mm.
- Available in a wide range of colours.
- All models suitable for use with standard collection and cleaning systems.
- CE Marking with sound power level shown in accordance with European Directive 2000/14/EC, 90.9 db.
- Product Approval Certificate awarded by TÜV Product Service GmbH in accordance with European Standard EN 840.
- UN certificate for the transportation of hazardous goods.
