

# MBA 240 Litre Bin

## The Classic Australian Icon

The Classic 240 litre bin should look as classic as it is with clean smooth injection moulded lines, free flowing rubber wheels that will outlast the bin itself, and an easy to open-close lid for awkward loading situations.

Iconic in almost every backyard in Australia, The 240 Litre bin is a marvel of German engineering dating back to the 70's when it was introduced and embraced by Australia.

These days MBA clients are in demand for differing colour options that denote different waste types and recycling uses, in keeping with Australian Standards. Source separation of waste is now a key topic on all resource recovery agendas hence the 240 Classic bin still carry's importance for how long it will last in the field.

Most importantly the MBA 240 litre bin is of a commercial grade and will last longer in the field than cheaper 'domestic' grade equivalents so you won't be buying twice.

Contact us today to place your order for the 240 Classic.

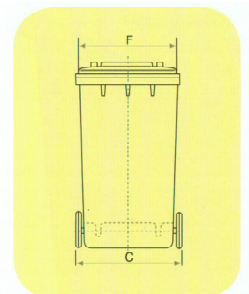

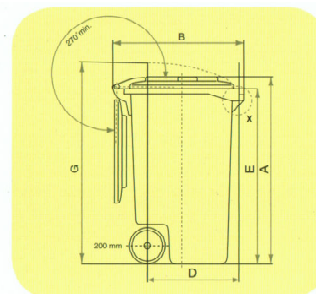

Our Classic 240 Litre bin is selected based on durability and strength when compared to cheap domestic grade alternatives. Built to withstand UV and weather conditions that Australia is known for, our 240 litre bin is designed to be used in commercial conditions, and is also suited to domestic use with less wear and tear.
